

# Residential Integrated Blinds

There are many advantages to ScreenLine® integrated blinds which might not be obvious on first-look: They can offer an improvement in acoustics, additional privacy due to the edge-to-edge slats and also a reduction in heat and solar glare which can enhance the u-value of your double glazing unit. But, perhaps the biggest advantage of ScreenLine Integrated Blinds is that they are built with a patented magnetic drive system which enables them to be sealed within double glazed units without compromising the integrity of the hermetic seal. This hermetic seal ensures that air and moisture cannot enter inside the unit once it is sealed and so the longevity of the double glazing and the blinds is assured.

- **No Dust**
- **No Dirt**
- **No Rattling**
- **No Damage**
- **UV Stable**

## At a Glance

- Manually operated for precise control
- Blinds can be raised or lowered to suit the weather conditions
